Contents

Part I <i>Agrobacterium tumefaciens</i>-Mediated Gene Transfer	1
Introduction I <i>Agrobacterium tumefaciens</i> , a Natural Vector System P.J.J. Hooykaas	3
Protocols	
1 Transformation of <i>Arabidopsis thaliana</i> Using Root Explants D. Valvekens, A. Van Gysel, M. Van Montagu, and M. Van Lijsebettens	5
2 Seed Transformation in <i>Arabidopsis thaliana</i> K.A. Feldmann	11
3 In Planta <i>Agrobacterium</i> -Mediated Transformation of Adult <i>Arabidopsis thaliana</i> Plants by Vacuum-Infiltration N. Bechtold and D. Bouchez	19
4 <i>Agrobacterium</i> -Mediated Transformation of Potato (<i>Solanum tuberosum</i>) J. Dietze, A. Blau, and L. Willmitzer	24
5 <i>Agrobacterium</i> -Mediated Transformation of Rapeseed (<i>Brassica napus</i>) J.B. Bade and B. Damm	30
Part II <i>Agrobacterium rhizogenes</i>-Mediated Gene Transfer	39
Introduction II <i>Agrobacterium rhizogenes</i> , a Natural Transformation System D. Tepfer	41
Protocol	
6 <i>Agrobacterium rhizogenes</i> -Mediated Transformation: Transformed Roots to Transformed Plants D. Tepfer	45
Part III Direct Gene Transfer to Protoplasts	53
Introduction III Direct Gene Transfer to Protoplasts I. Potrykus	55

Protocols

- 7 Polyethylene Glycol-Mediated Direct Gene Transfer to Tobacco Protoplasts and Regeneration of Transgenic Plants
G. Spangenberg and I. Potrykus 58
- 8 Polyethylene Glycol-Mediated Direct Gene Transfer to Indica Rice Protoplasts and Regeneration of Transgenic Plants
S.K. Datta 66
- 9 Plastid Transformation by Polyethylene Glycol Treatment of Protoplasts and Regeneration of Transplastomic Tobacco Plants
H.U. Koop and W. Kofer 75
- 10 Electroporation-Mediated Gene Transfer to Protoplasts and Regeneration of Transgenic Plants
M.G.K. Jones 83
- 11 Electroporation Mediated Gene Transfer to Japonica Rice Protoplasts and Regeneration of Transgenic Plants
C. Wu and K. Shimamoto 93
- 12 Regeneration of Transgenic Maize Plants from Embryogenic Protoplasts After Polyethylene Glycol-Mediated DNA Uptake
S. Omirulleh, S. Mórocz, and D. Dudits 99
- 13 Gene Transfer to Protoplasts: Transient Gene Expression Analysis
J.C. Carle Urioste, K. Marrs, J. Bodeau, and V. Walbot 106

Part IV Biolistic Plant Transformation 113

Introduction IV The Biolistic Transformation System

- T. Klein 115

Protocols

- 14 Transient Gene Expression Studies with the Biolistic System
D.A. Russell and M.E. Fromm 118
- 15 Maize Transformation by Microprojectile Bombardment of Immature Embryos
E. Dunder, J. Dawson, J. Suttie, and G. Pace 127
- 16 Biolistic Transformation of Microspore-Derived and Immature Zygotic Embryos and Regeneration of Fertile Transgenic Barley Plants
Y. Wan and P.G. Lemaux 139
- 17 Transformation of Soybean (*Glycine max*) Through Electric Discharge Particle Acceleration
P. Christou 147
- 18 Ballistic Microtargeting of Visible Marker Genes to the Shoot Meristem of Wheat
C. Sautter and R. Bilang 152

19	Stable Transformation of Wheat by Microprojectile Bombardment J.T. Weeks	157
20	Biolistic-Based Analysis of Chloroplast Gene Expression U. Klein and L. Bogorad	162
Part V Microinjection and Fiber-Mediated Transformation		171
Introduction V Microinjection into Plant Cells: Methodology and Applications		
	G. Neuhaus	173
Protocols		
21	Microinjection into Tobacco Protoplasts and Regeneration of Transgenic Plants M. Schnorf, B. Kost, A. Galli, and G. Neuhaus	176
22	Silicon Carbide Whisker-Mediated Transformation: Regeneration of Transgenic Maize Plants K. Wang, B.R. Frame, P.R. Drayton, and J.A. Thompson	186
Part VI Tissue Electroporation		193
Introduction VI Transformation by Tissue-Electroporation		
	I. Potrykus	195
Protocols		
23	Transient Expression Following Electroporation into Immature Zygotic Embryos of Wheat A. Klöti	196
24	Transgenic Indica Rice Plants by Electroporation of Seed Embryo Cells X. Xu, H. Shi, and B. Li	201
Part VII Analysis of Transgenic Plants		209
Introduction VII Analysis of Transgenic Plants		
	I. Negrutiu	211
Protocols		
25	Standard Molecular Techniques for the Analysis of Transgenic Plants J. Fütterer, A. Gisel, V. Iglesias, A. Klöti, B. Kost, O. Mittelsten Scheid, G. Neuhaus, G. Neuhaus-Url, M. Schrott, R. Shillito, G. Spangenberg, and Z.Y. Wang	215
25.1	Isolation of Genomic DNA from Plants	215

25.2	Isolation of Total RNA from Plant Tissues	218
25.3	Southern Blotting Technique with Genomic DNA from Plants ...	221
25.4	Southern Blot Hybridization with Radioactive Probes	224
25.5	Southern Blot Hybridization with Nonradioactive Probes and Detection by Chemiluminescence	229
25.6	RNA Analysis by Northern Blot Hybridization	233
25.7	Western Blot Analysis	237
25.8	PCR Amplification of Plant Genomic DNA	242
25.9	Enzyme Assay for Phosphinotricin Acetyltransferase	245
25.10	Enzyme Assay for Hygromycin Phosphotransferase	247
25.11	Enzyme Assay for Neomycin Phosphotransferase II	250
25.12	Enzyme Assay for Chloramphenicol Acetyltransferase	253
25.13	Enzyme Assay for β -Glucuronidase	256
25.14	Firefly Luciferase Assay	260
26	In Situ Hybridization on Plant Metaphase Chromosomes I. Farbos and A. Mouras	264
27	Localisation of RNA Transcripts in Plant Tissue by in Situ Hybridisation A.Y. Fleming	273
28	In Situ Immunolocalisation of Transgene Products in Transgenic Plants S. Craig and T.J.V. Higgins	286
Part VIII Establishment and Maintenance of Embryogenic Cultures ..		291
Introduction VIII Embryogenic Cultures: a Source of Target Cells for Gene Transfer G. Spangenberg		293
Protocol		
29	Establishment of and Plant Regeneration from Embryogenic Cell Suspensions and Their Protoplasts in Forage Grasses Z.Y. Wang, G. Legris, and G. Spangenberg	295
Part IX Genetic Markers and Expression Signals.....		305
Introduction IX Genetic Markers and Expression Signals J. Fütterer		307
30	Expression Signals and Vectors J. Fütterer	311
31	Selectable Marker and Reporter Genes M. Schrott	325

Part X Guidelines and Biosafety Considerations	337
Introduction X Gene Technology with Plants and the Public	
I. Potrykus	339
32 Release of Transgenic Plants: Regulations and Developments	
J. Landsmann	340
33 Risk Assessment	
K. Schlüter	350
